Profile

Results-driven Computer Science graduate (Btech, CGPA 8.0) with hands-on experience across full-stack web development, Python-based computer vision, and SQL-backed data workflows. Built and deployed production-ready web experiences and an end-to-end face recognition attendance system. Skilled in Java, Python, JavaScript, HTML/CSS, and MySQL; fluent with Git/GitHub and modern development practices. Eager to contribute to high-impact engineering teams building scalable, user-centric products.

Skills

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frameworks/Libs: OpenCV, dlib

Tools: Git, GitHub, VS Code, IntelliJ

Core strengths: Full-stack web, UI/UX implementation, algorithms & data structures, debugging, code reviews, performance-minded deployment

Experience

Full Stack Developer

Dec 2025 – Feb 2026

Sunsystechsol Pvt. Ltd.

Remote, India

- Designed, built, and deployed a responsive corporate website for *Sunsys Global* showcasing IT staffing, offshore engineering, and global talent mobility services.
- Implemented clear information architecture and accessible UI/UX, improving navigation clarity and brand presentation.
- Deployed via GitHub Pages with performance-minded asset optimization; collaborated on content structure aligned to business goals.

Projects

Spotify Clone (Web)

Nov 2025 – Dec 2025

- Implemented a functional music player interface using HTML, CSS, and JavaScript with playlists, now-playing controls, and song selection.
- Built responsive layout and intuitive navigation; deployed as a live web app on GitHub Pages.

Face Recognition Attendance System

Feb 2024 – Mar 2024

- Developed a Python-based attendance system using OpenCV and dlib for real-time face detection and recognition.
- Automated attendance marking and integrated with a database for reliable tracking and reporting.

Education

GD Goenka University, Gurugram, India

2021 – 2025

Bachelor of Engineering in Computer Science & Engineering

CGPA: 8.0

Certifications

JavaScript (LetsUpgrade, Sep 2025) — SQL (LetsUpgrade, Dec 2025) — Full Stack Developer (Sunsystechsol, Feb 2026)

Additional Highlights

- Version control best practices (branching, PR reviews), semantic HTML, accessible components, and mobile-first design.
- Strong problem-solving with data structures & algorithms; comfortable translating product goals into technical execution.
